

LIME & SHAP – Installation, Verification & Troubleshooting Guide

This document provides an end-to-end checklist for installing, verifying, updating, and troubleshooting **LIME** and **SHAP** across multiple environments:

- Jupyter Notebook
- Local Environment Terminal (Command Line)
- Google Colab

1. Jupyter Notebook (pip-based)

Check Version

LIME

```
import lime
lime.__version__
```

SHAP

```
import shap
shap.__version__
```

Install Latest Version

```
!pip install lime shap
```

Update LIME & SHAP

```
!pip install --upgrade lime shap
```

Install Specific Versions

```
!pip install lime==0.2.0.1  
!pip install shap==0.44.1
```

Download Only

```
!pip download lime shap
```

Uninstall

```
!pip uninstall lime shap -y
```

2. Conda Environment (Anaconda)

Install LIME & SHAP

```
conda install -c conda-forge lime shap
```

Check Version

```
conda list lime  
conda list shap
```

Update LIME & SHAP

```
conda update lime shap
```

Install Specific Versions

```
conda install -c conda-forge lime=0.2.0.1 shap=0.44.1
```

Download Only (Without Installing)

```
conda install --download-only -c conda-forge lime shap
```

Uninstall

```
conda remove lime shap
```

3. Google Colab

LIME and SHAP are **not pre-installed** in Colab.

Install LIME & SHAP

```
!pip install lime shap
```

Check Version

```
import lime
import shap

print(lime.__version__)
print(shap.__version__)
```

Update / Reinstall

```
!pip install --upgrade lime shap
```

Install Specific Versions

```
!pip install lime==0.2.0.1
!pip install shap==0.44.1
```

Download

```
!pip download lime shap
```

Uninstall (Not Recommended)

```
!pip uninstall lime shap -y
```

Note

- **Restart runtime after installation or version changes.**
