

Scikit-learn (sklearn) - Installation, Verification & Troubleshooting Guide

This document provides an **end-to-end checklist** for installing, verifying, updating, and troubleshooting **scikit-learn** across multiple environments:

- Jupyter Notebook
- Local Environment Terminal (Command Line)
- Google Colab

1. Jupyter Notebook (pip-based)

Check Version

```
import sklearn
```

```
sklearn.version
```

Install Latest Version

```
!pip install scikit-learn
```

Update scikit-learn

```
!pip install --upgrade scikit-learn
```

Install a Specific Version

```
!pip install scikit-learn==1.3.2
```

Download Only (Wheel/Source)

```
!pip download scikit-learn
```

Uninstall scikit-learn

```
!pip uninstall scikit-learn -y
```

2. Conda Environment (Anaconda)

Scikit-learn is pre-installed in Conda.

Check Version

```
conda list scikit-learn
```

Install Latest Version

```
conda install scikit-learn
```

Update scikit-learn

```
conda update scikit-learn
```

Install a Specific Version

```
conda install scikit-learn=1.3.2
```

Download Only (Without Installing)

```
conda install --download-only scikit-learn
```

Uninstall scikit-learn

```
conda remove scikit-learn
```

3. Google Colab

Scikit-learn is pre-installed in Colab.

Check Version

```
import sklearn
```

```
sklearn.version
```

Update / Reinstall scikit-learn

```
!pip install --upgrade scikit-learn
```

Install a Specific Version

```
!pip install scikit-learn==1.3.2
```

Download scikit-learn

```
!pip download scikit-learn
```

Uninstall scikit-learn (Not Recommended)

```
!pip uninstall scikit-learn -y
```

Note: Restart runtime after changes.
